WEBSITE PROJECT PROPOSAL 1

Sweet Crumbs Bakery

1. Organisational Overview

Name: Sweet Crumbs Bakery

Sweet Crumbs Bakery is an imaginary small bakery operating out of Polokwane, Limpopo Province. The bakery was created to sell fresh baked food like cakes, cupcakes, bread, pastries, and other baked foods. The website under development will offer customers easy access to information about the bakery and its products.

Mission: To offer our customers fresh, affordable, and quality baked food while offering friendly and reliable services.

Vision: To be known as a dependable local bakery offering quality products and excellent customer services.

The targeted audience will include locals, students, families, businesses and individuals looking for cakes and baked foods for birthday parties, wedding ceremonies, and other occasions.

2. Objectives of the Website

The objective of the website is to create an online presence of Sweet Crumbs Bakery and facilitate easy access of the products as well as enquiring from customers.

Objectives of the website are:

To increase awareness of the bakery.

To showcase the products/services available.

To allow the customer to make an enquiry of the customized cake.

To provide contact and location details.

To ensure that information is easily accessible via cell phone and computer.

Key Performance Indicators (KPIs) would be the number of website visitors, product enquiry, form submissions and customer interaction.

3. Analysis of the Current Website

Since Sweet Crumbs Bakery is a fictional organization, hence it does not possess an existing website. The new website would help in addressing this issue.

4. Web Page Functions and Features

The web pages will include a minimum of five pages:

Home – introduction, images and call to action.

About Us – bakery background, its vision and mission.

Products – list of cakes, cupcakes, bread and pastries.

Inquiries – form for customer inquiry for ordering their product or custom-made cake.

Contact Us – contact information and location of the business.

HTML will define the web pages, while CSS will style them. JavaScript can be included in certain interactive elements such as form validation (MDN Web Docs, 2026).

5. Design and User Experience

The colour theme will be made up of cream, brown and soft pink giving a warm feeling that relates to bakery. The typography will be simple and legible. The website will have clear navigation and consistent designs. It will have a responsive design that adjusts to different screen sizes, which is necessary for mobile friendly websites (Google, 2025).

6. Technical Specifications

HTML, CSS and JavaScript will be used for the site development process. The website will go through testing procedures that include web browser and screen size testing. A proper domain name and web hosting services will be needed once the website will be published.

7. Timeline and Milestones

Week	Activity
1	Research and planning
2	Site map and wireframes
3	HTML development
4	CSS& JavaScript
5	Testing and Corrections

8. Budget

The budget for the project will be R2,500, which includes basic development, domain name registration, and hosting.
