

Research and Planning

1. Website Purpose

The website's purpose is to introduce the bakery and provide customers with information regarding the products and services offered by the business. This website will allow visitors to view the bakery products and make an enquiry.

2. Target Audience

The target audience includes:

Students and young adults

Families

Local clients

Clients interested in cakes/baked products for their birthday

Customers who wish to make an enquiry regarding bakery products

3. Website Objectives

The objectives of the website include:

To introduce Sweet Crumbs Bakery and its products.

To make it easier for clients to find the information they need.

To show the bakery products through pictures and descriptions.

To allow the customers to make enquiries.

To provide the customers with contact information for the bakery.

To create an attractive presence on the web.

4. Content Research

The website will contain information which is needed by the customers when browsing the bakery websites. Research into other bakery websites reveals that the important content of the websites includes menu/product information, bakery introduction, product images and contact/inquiry details.

The Sweet Crumbs Bakery website will have the following content:

Bakery information

Product categories

Product names and descriptions

Product images

Inquiry

5. Design Research

The website will have a warm and friendly design to support the theme of the bakery. Bakery websites need nice product photography and categories of the products since clients need to see what the bakery sells.

The website will include:

Warm colors

Headings

Readable fonts

Bakery-related pictures

Consistent navigation

Simple page layouts

Clickable buttons and links

6. Competitor/Existing Website Research

Common pages that can be found in existing bakery websites include Home, About, Menu/Products and Contact pages. Sometimes some pages such as Gallery, FAQ, custom orders and online ordering may be included.

Considering the above research, the website of Sweet Crumbs Bakery will be simple and will include only the necessary pages.

7. Technical Requirements

The website will be created with the following technical requirements:

HTML to create the structure of the pages

CSS for styling and layout

Images to display the products of the bakery

GitHub to host and publish the website

The website will have several linked HTML pages.
